

EARLY LEARNING FACT SHEET

Promoting early learning and development Birth to 8

Focus on Head Start & State Pre-K

High-quality preschool programs help children gain important early social-emotional, cognitive, and literacy skills so they are better prepared to succeed in school and life.¹ Children have access to publicly funded preschool through Head Start and State Pre-K programs. Some children also participate in preschool through federal and state investments in child care subsidies.

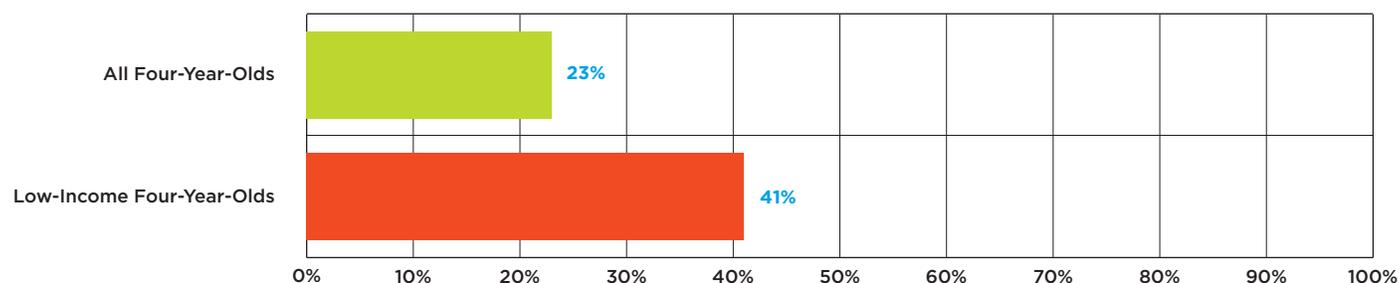

Head Start is a two-generation program that provides preschool and comprehensive family services to very low-income children. Children who participate in Head Start show improvements in math, language, and literacy skills, have fewer behavior problems, are less likely to repeat a grade or receive special education, and are more likely to graduate from high school and attend college.

Rhode Island Head Start grantees receive \$19.1 million in federal funds and \$800,000 in state funds to serve 2,063 children ages three through kindergarten entry. There are six federal Head Start grantees in Rhode Island: CHILC, Inc., Children's Friend, Comprehensive Community Action Program, East Bay Community Action Program, Tri-County Community Action Agency, and Woonsocket Head Start Child Development Association.^{2,3,4,5}

Rhode Island State Pre-K was launched in 2009-2010 after passage of the *Rhode Island Prekindergarten Education Act*, which required the Rhode Island Department of Education to design a State Pre-K program that met high-quality standards and was built on the existing early childhood education infrastructure. The Rhode Island State Pre-K program meets all recommended quality benchmarks and uses a diverse delivery system of community-based programs (Head Start agencies and child care programs) and public schools.

An independent evaluation found that children who participated in Rhode Island State Pre-K had improved language and literacy skills and the program closed the achievement gap between low-income children and their more affluent peers by three-quarters. As of 2016, the State Pre-K program served 995 children who were one year away from entering kindergarten and was financed with \$5.2 million in state resources and a \$5.8 million federal Preschool Development grant. The Rhode Island State Pre-K program is included in the state's education funding formula, with an increase in funding planned each year to sustain and grow enrollment.^{6,7,8,9}
